Examiner's Comment

The art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 6,297,367 is made of record but cannot serve as prior art for the instantly claimed invention. The patent discloses sequences (SEQ ID NO:2, 17 and 20) sharing high identity with SEQ ID NO:1 of the instant application; however, the patent receives priority back only to April 5, 1999. The earlier priority application, US 60/068,959 (filed 12/30/97), does not disclose a ligand or utility for the tnfrGT-1 or -2 soluble receptor (the proteins related to SEQ ID NO:1 of the current application), and so one could not identify or screen for the instantly claimed antibodies.
